

Minutes October 10, 1995

Members Present: Muriel Lazzarini, Ray Tryon, Howard Burns, Connie Ohman

The Chair read the Notice of Public Meeting for Buonaguro/Swanson. They want to repair a dock. It will rest on the same supports. There will be a small amount of concrete to hold the dock to the supports. Howard Burns pointed out that a small amount of concrete will not stop the ice action.

There is no problem for the wetland protection act. It will be located in the center of the property. The determination was N3.

Gould Farm DEP questioned why they were not using a dry hydrant. They will need to dig a ditch. They will write up what they are going to do and file it as an addendum. Chris Blair will be authorized to allow the project after he sees the paper work. If he feels there is a problem he will bring it to the next meeting.

Miller The members scheduled the RDA meeting for Miller on October 24, 1995. (this meeting was subsequently canceled at the request of the applicant).

Lake Garfield. Selectman, Stefan Grotz, requested the CC discuss the drawdown again as the conditions have improved. There is some concern on the part of the CC because what rain we have had has not come down the brooks, it is soaking into the ground. The fire chief is now comfortable with a partial drawdown. The CC will notify the DEP that the town will immediately commence a 3' flood control drawdown at the rate of 1' per week ending Oct 31, 1995. The CC will get a formal request from the Selectboard.
